

Health Screens for Employees

Building a Healthier Workforce

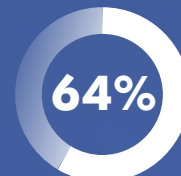

Investing in the Future of your Workforce

Around 148.9 million working hours were lost due to sickness absence in the UK in 2024
(ONS, 2025)

Around 49% of UK workers took at least one period of sickness absence from 2024-2025.
(GOV.UK 2025)

Over 64% of workplaces and organisations are taking action to reduce workplace stress and improve health.
(CIPD, 2025)

At Randox Health, we understand that a healthy workforce is the foundation of a successful business. In today's fast paced world, employees face increasing challenges that impact their well-being and productivity. That's why we offer comprehensive health checks designed to support your team's health, boost performance and reduce absenteeism.

Partnering with Randox means more than just a health check - its proactive investment in your company's future. Our advanced testing, flexible solutions and tailored insights empower your employees to take control of their health, helping you create a healthier, more engaged and productive workforce.

Why Partner with Randox Health?

- With over 40 years of experience in the global diagnostics industry, Randox offers expert-led solutions you can trust.
- We provide flexible screening options, whether it's on-site testing, at-home test kits or through our nationwide network of clinics.
- Our packages are designed to fit companies of all sizes and budgets, ensuring accessible healthcare for all.
- You'll have a dedicated account manager to tailor the perfect package to your business needs.
- Choose from a range of services including vaccinations and comprehensive health checks, all designed to keep your workforce healthy and productive.

From Our Test Results in 2025

64% of adults had high LDL cholesterol – this can put you at higher risk of heart disease and stroke.

(based on 178,500 results)

14,400 males had low testosterone levels – this can affect concentration, energy, and focusing.

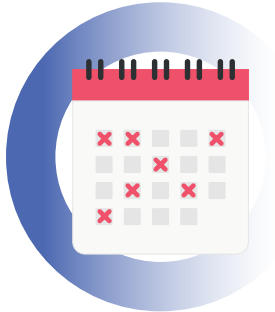

(based on 161,600 results)

1 in 10 women are classified as anaemic – this can cause extreme fatigue, weakness, and shortness of breath.

(based on 33,000 results between Jan-May 2025)

Why Invest in Employee Health Screening?

The UK saw 40.1 million working days lost to work-related ill health and injury in 2024/25, with each person affected taking around 16.4 days off.

- HSE, 2025

Offering health assessments as part of your incentive package or corporate perks scheme helps you to foster a healthier, more productive and engaged workforce, driving long-term success.

Reducing Absenteeism

Improving Productivity

Better Employee Engagement

Improved Employee Morale and Engagement

Peace of Mind

Faster Access to Correct Treatment

Early Detection of Potential Illnesses

Improved Health and Well-being

***BUILDING A
STRONGER FUTURE
FOR YOUR TEAM***

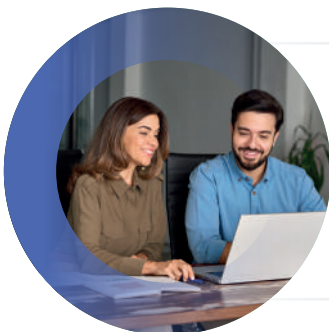

Our Packages

We offer convenient and cost-effective health assessments on-site at your workplace or through our extensive network of diagnostic health clinics across the UK. Alternatively, our home sampling collection kits offer employees the ability to test conveniently from the comfort of their own home.

Vital Health Assessment

Help employees to better understand their health baseline by reviewing vital areas, including diabetes, heart health, and body composition analysis.

Insight Health Assessment

With the Insight health package, employees are empowered to proactively monitor and improve their health. Measure up to 150 data points across key health areas, including hormones, nutrition, and digestive health.

Executive Health Assessment

Our most comprehensive package is curated to deliver real-time insights on current health and future health risks. The Executive measures up to 350 data points relating to key health areas.

You will receive a personalised report containing important information about your hormone levels, nutrition, heart disease risk, stress, and optional sexual health screening. The report also includes tests for tumor-associated markers, autoimmune conditions, genetic testing for inherited conditions, and an optional ECG.

Hybrid

Personalised Health Data for Staff

3

Employees receive personalised health reports via email, which can also be securely accessed through the Randox Health App. Printed reports can be requested.

Workforce Analytics Delivered to Employer

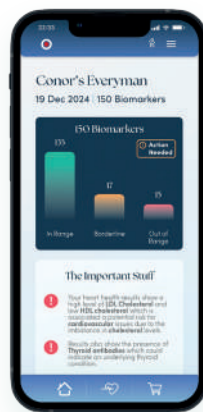

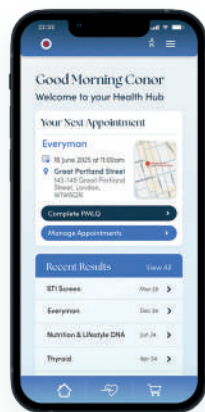

4

After conducting a thorough analysis, receive a comprehensive report summarising key findings to assist you in taking action to help improve the health of your workforce.

Powerful Personalised Health Data

With the Randox Health App, users can easily access their personalised health report, providing a breakdown of their results, and the next steps to help track and improve their health data.

Workforce Analytics

As the Employer you will receive a detailed report summarising any health trends identified helping you to take action to build a healthier workforce.

Dedicated Female Health Packages

Supporting female health is key to both employee well-being and workplace productivity. Offering tailored health checks for women at every life stage not only helps employees to stay informed but creates a more engaged workforce and increases job satisfaction.

Female Hormone

Measures eight key hormones to identify if an imbalance could be affecting energy levels or other health areas.

Menopause

Measures over 30 data points, to provide a better understanding of health around menopause, including risk of heart disease and diabetes, nutrition and bone health.

Fertility Health

Measures over 45 data points including reproductive hormone levels, thyroid function and ovarian reserve.

Polycystic Ovary Syndrome (PCOS)

Measures 45 data points including hormones, which help detect PCOS in women with irregular menstrual periods, and tests to identify potential risks associated with PCOS, such as diabetes.

Anti-Mullerian Hormone (AMH)

Designed to provide more information on ovarian reserve.

Dedicated Male Health Packages

By offering regular health screenings, companies can support their male employees in staying healthy, identifying potential issues early and boosting productivity.

Male Hormone

Measures 8 key hormones linked to mood, energy and sports performance to provide a complete overview of male hormonal health.

Advanced PSA

Our Advanced PSA blood test combines a traditional PSA test with our novel Prostate Cancer Risk score to **more accurately** assess prostate cancer risk.

At-Home Testing Service

Offer your employees the convenience of at-home testing to provide actionable insights to enhance their health, productivity, and motivation.

Heart Health

Vitamin B12

Vitamin D

Thyroid Health

Prostate-Specific Antigen (PSA)

Anti-Mullerian Hormone

General Health

Male Hormone

Female Hormone

Genetic Haemochromatosis

Genetic Coeliac Disease

Genetic Lactose Intolerance

Microbiome

Nutrition & Lifestyle DNA

Genetic Cancer Risk

Genetic Breast & Ovarian Cancer Risk
